

*PROTECTRAIL (242270) - The Railway-Industry Partnership
for Integrated Security of Rail Transport*

PROTECTRAIL

SP2 - WP2.7

Stakeholders Advisory and Validation Group (SA&VG)

Giuseppe Boccassi – Ansaldo STS

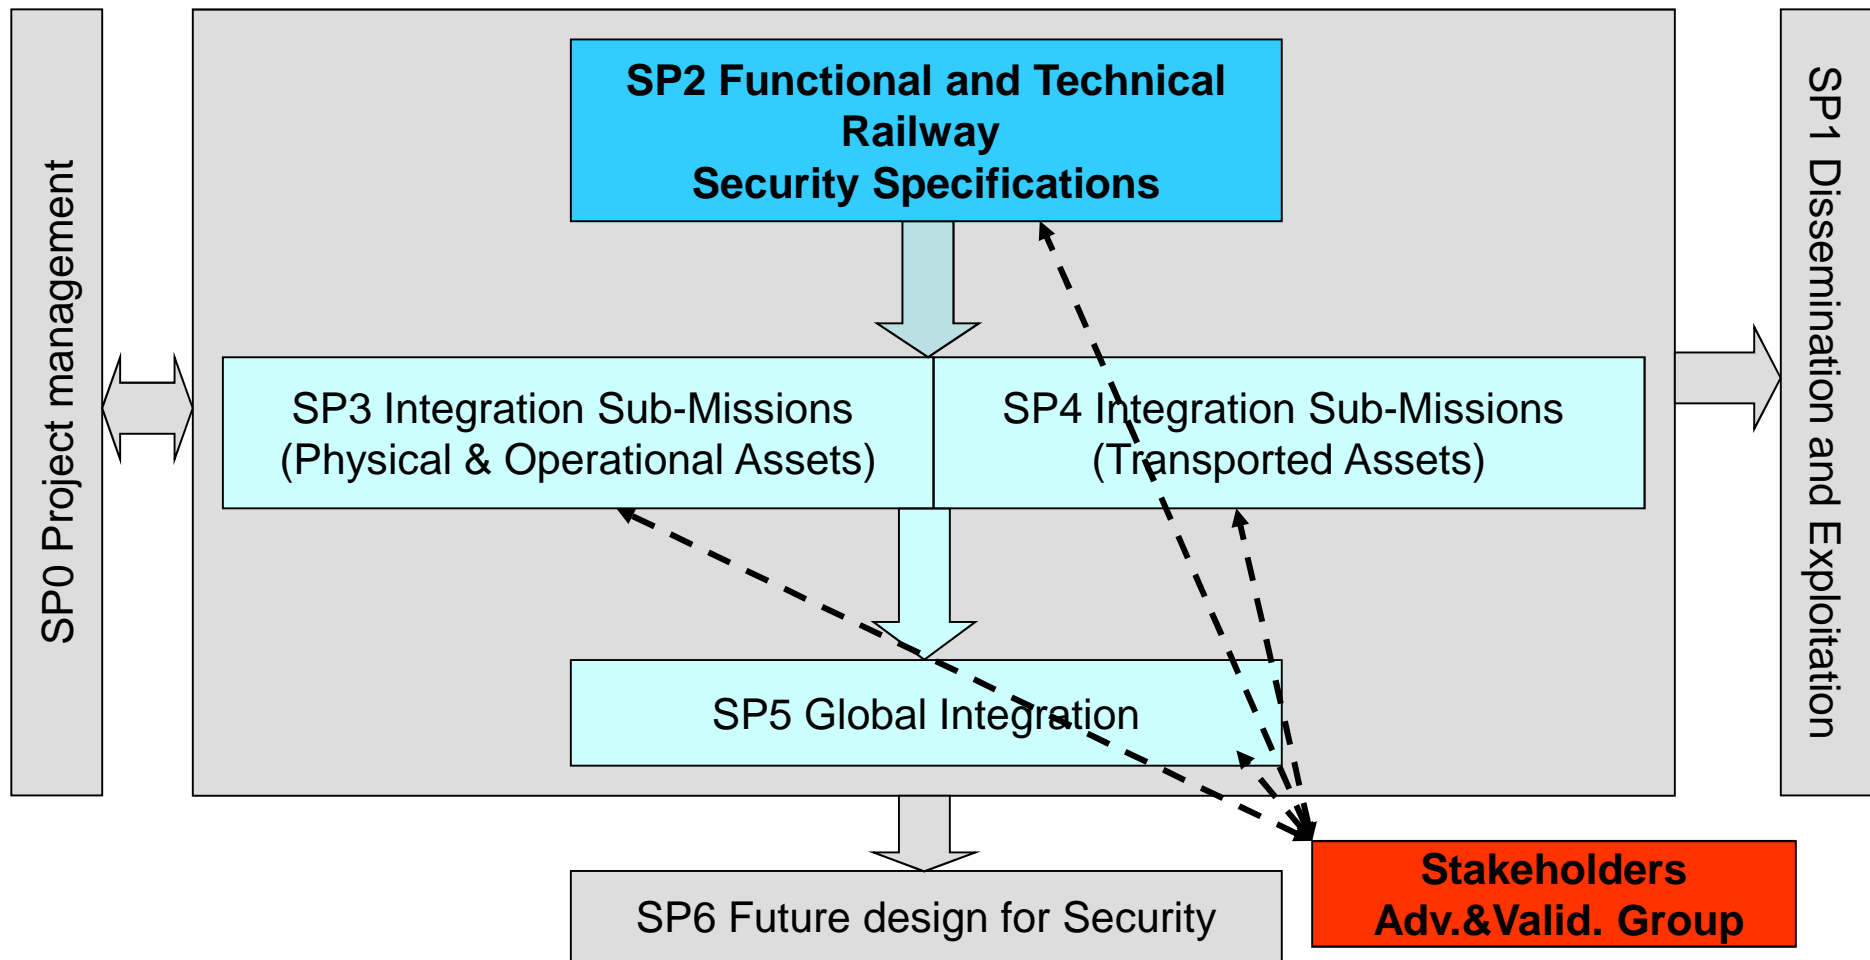

The SA&VG (WP2.7) Objectives

The objectives of WP27 are:

- 1.To set-up and maintain a Stakeholders Advisory And Validation Group (SA&VG) composed by: railway operators/owners, authorities and industries;
- 2.To support the generation, prioritization and refinement of requirements and specifications and to provide advice on and feedback to SP3, SP4 and SP5.

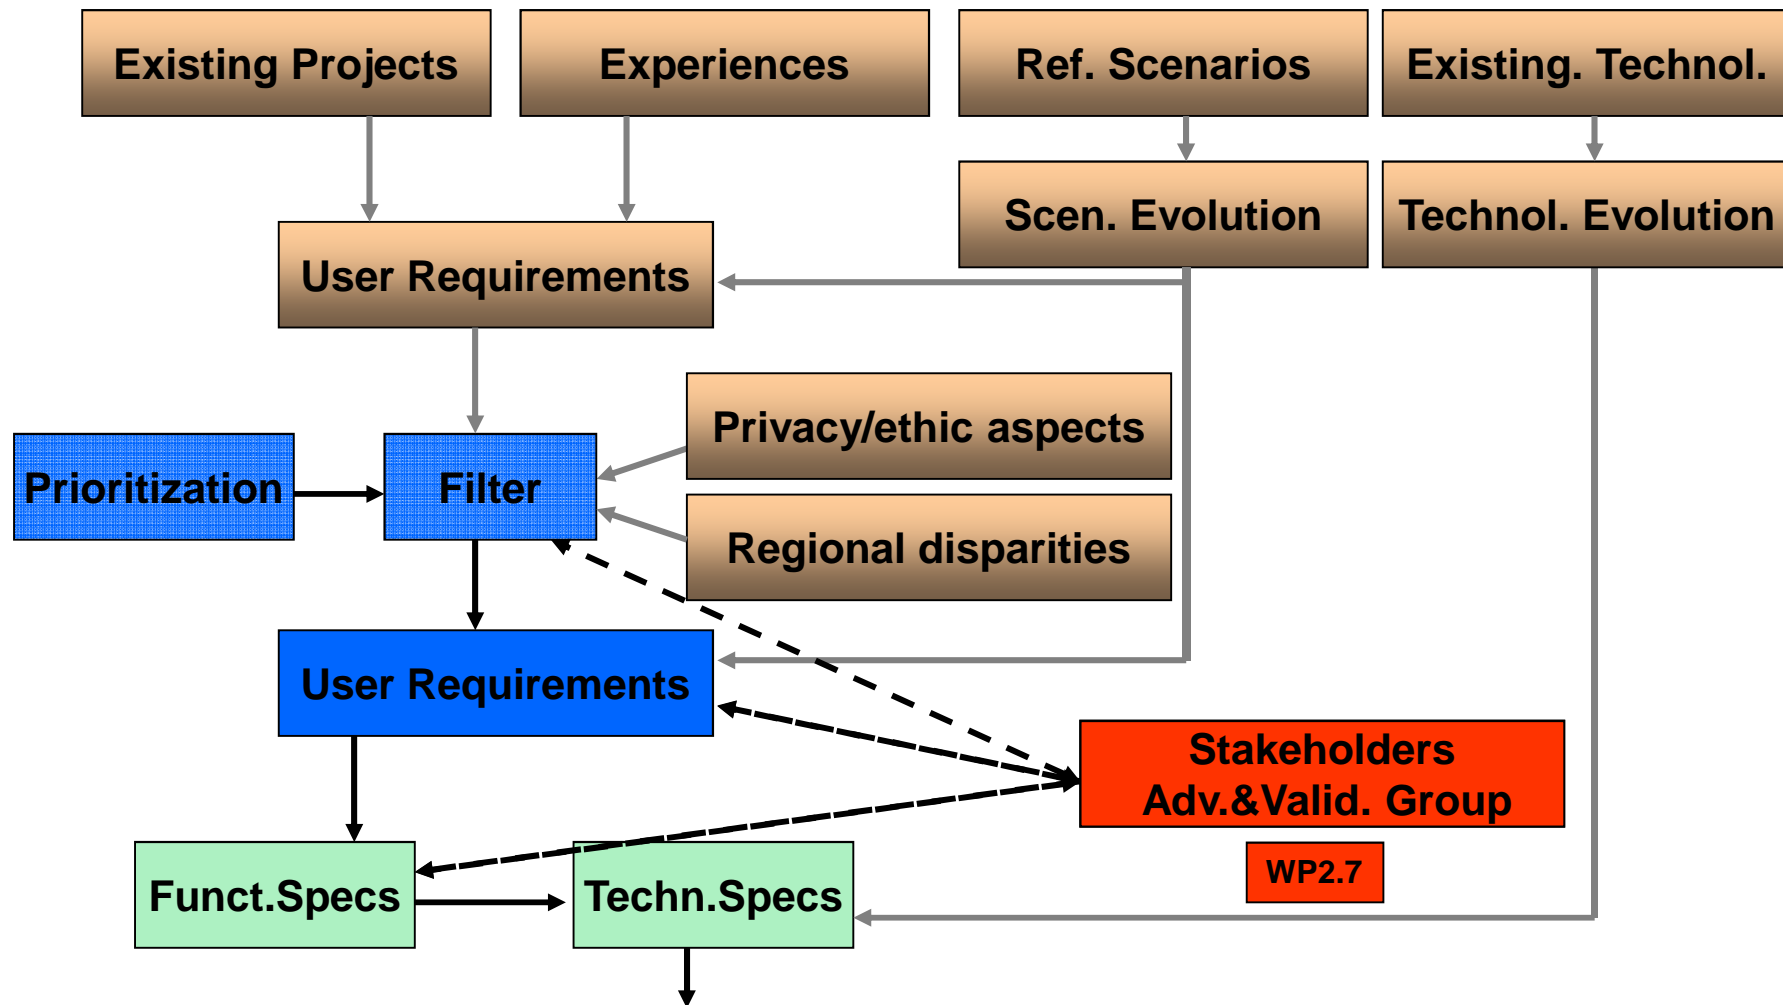

Protectrail and the SA&VG

SP2 and the SA&VG

The SA&VG Participants

1. Railway operators and owners (internal and external to Protectrail);
2. Authorities;
3. Industries involved in the project and some their technological partner;
4. UIC security platform.

How the Stakeholders are expected to contribute

1. Support the project through their specific knowledge and experience during the main phases of the project, i.e.:
 - **Sp2 fundamental output releases**
 - **User Requirements and their prioritizations**
 - **Scenarios selection**
 - **Functional specifications.**
 - **Demonstrators specifications and objectives**
2. Provide suggestions and experiences on the Organization aspects and on mutual involvement of different subjects cooperating on the Security framework
3. Reach a common view (Railways, Authorities and Industries) on the relevant outputs of the project.

What the Stakeholders can obtain from PROTECTRAIL

- A participation to a large group of subjects, all involved in security aspects, with whom to share experiences and knowledge;
- To collect information on technologies possible applications and their trend in the future;
- To have access to all documents delivered by the project and classified as “Not Confidential”
- To be present at the final step of demonstrators stages.
